Free Software Chamber of Commerce

(FSCC)

Freeing New York Businesses

Free Software Chamber of Commerce

NYLXS's Free Software Chamber of Commerce is the first place for Businesses and Consultants to come together, network and discover the exiting opportunity in deploying Free Software in Business and Enterprise.

Our Business Network provides three basic functions for the NYC Business Community:

First – We provide one stop shopping for small and large businesses to find the IT support it needs to enable their businesses without being coerced into forced contracts and licenses. Buy once, use to your hearts delight, that's the promise of Free Software to your business. And pay for support when needed. This should be the first place to find qualified help with your business information infrastructure needs.

Second - Our network of consultants will join forces together to deliver a broad range of business needs, by working together, and sharing the marketing, and promotions costs needed to get services to the public. In addition, consultants in our network need never feel alone. The entire network is at your disposal for sub-contracting and advice. It's the Free Software way.

Third - We have created a network for IT professionals to get together and discuss, face to face our needs for clients and share efforts to fill orders, and promote new sales. This network is not only for IT Professionals, but also businesses using Free Software and who need get work done, to get estimates for costs, and to work out contracts

FSCC Services

Welcome to the Free Software Chamber of Commerce. In this area you will find access to New Yorkers largest collection of Free Software Professional and the goods and services they provide. In addition, you will find here reprints of articles which demonstration the financial advantages to using Free Software, and answers to your tech support questions.

Free Software in deployed today in all kinds of enterprise environments from super-computers and banks, to small mom and pop businesses. It's adopted on the desktop, on backend servers, for file services, accounting, imaging, education, mathematical modeling, bar coding, inventory control, document tracking, e-commerce, mail servers, secure networking, and more.

And Free Software provides all these services without coercive licensing, per seat limits, software time outs, or force upgrades. Does it sound too good to be true?

Well the magic which makes this possible is called Free Markets. The Free in Free Software is like the Free in Free Enterprise. Free Software is licensed in such a way to empower the user, empower your consultants, and to empower you. Free Software will give you the competitive edge you need to survive in today's business environment.

To get a hold of one of our consultants. email us at info@nylxs.com and in the subject of your email, please type "FSCC"
